The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (instant pages 1 and 2) in view of Yan 7059868 and Ikuta 6805597.

The admitted prior art substantially discloses the claimed invention except for the contact surface of the electrical connection part being coated with gold doped with cobalt or nickel, the gold having a thickness of around 5 micrometers and a purity of at least 97%, the contact surface having a hardness of at least 80 HV, and only the contact surface being gold plated. Yan discloses a gold coating 704 doped with nickel, and to provide the contact surface of the electrical connection part of the admitted prior art with such a gold-nickel coating thus would have been obvious, for better conductivity. The thickness and purity of the gold and the contact surface hardness would have been obvious matters of routine experimentation. Ikuta discloses only plating the contact surface, not the entire contact, with gold, and to only gold plate the contact surface of the electrical connection part of the admitted prior art with gold thus would have been obvious, to eliminate unnecessary cost.

Applicant's arguments filed July 2, 2007 have been fully considered but they are not persuasive. Ikuta clearly teaches the obviousness of plating only the contact

surface with gold. If the supply and connection part were not exposed to a corrosive environment, then obviously it would not be plated with gold, for cost savings.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
